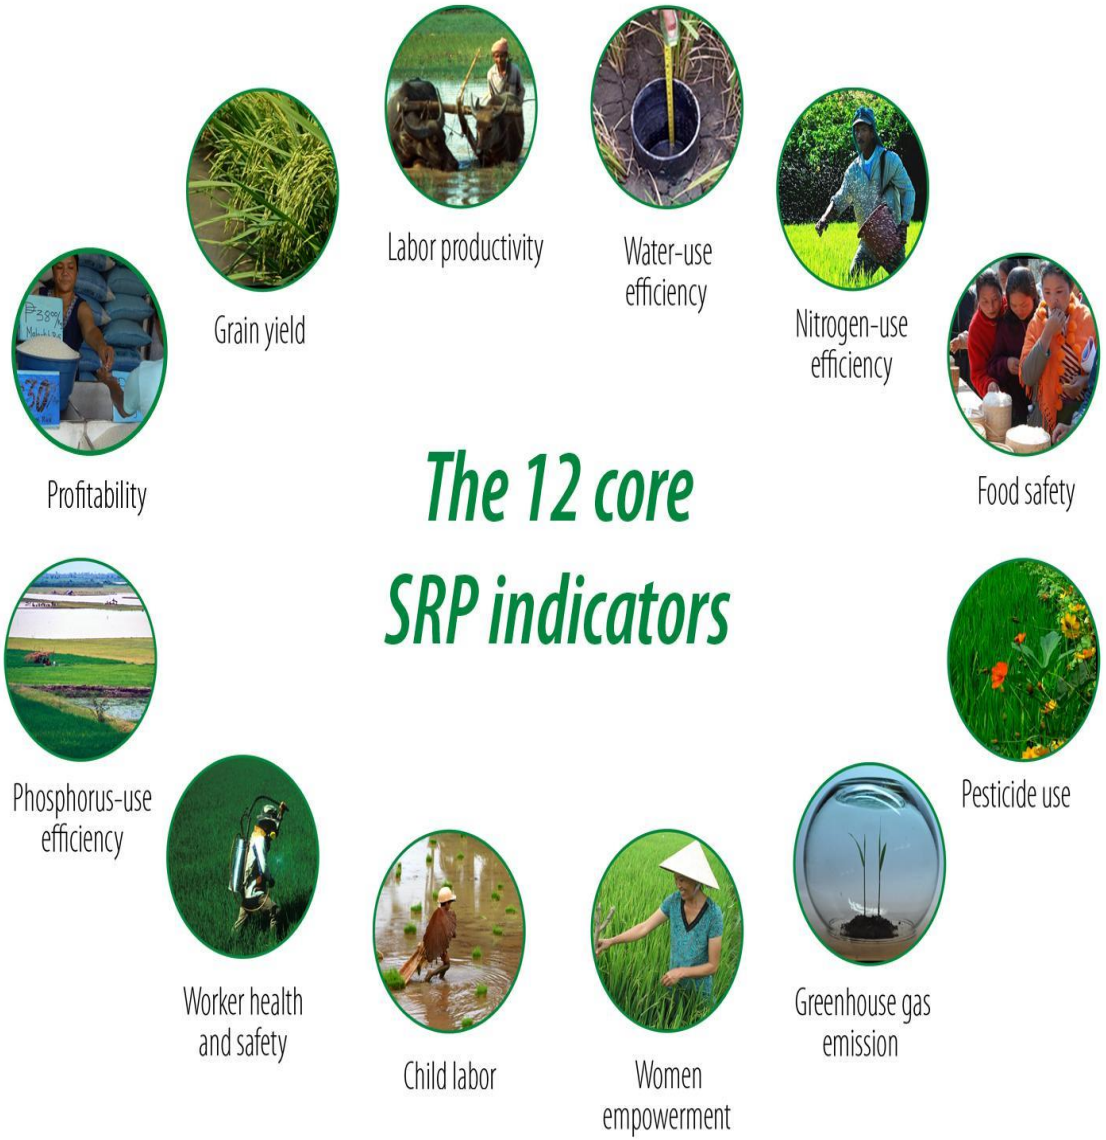
The evolution of the indicators



The SRP Performance Indicators launched in October 2015 during the 5th SRP Plenary meeting in Manila

Indicators 1.0

Designed to be collected through farmers' diary,
linked to the standard by ….

Indicator title	Measurement
1. Profitability: net income from rice	$/ha/year
2. Labor productivity	Kg paddy rice/days
3. Productivity: grain yield	Kg paddy rice/ha
4. Food safety	Kg safe milled rice/kg milled rice x100
5. Water use efficiency: total water productivity	Kg paddy rice/L (rainfall + irrigation)
6. Nutrient use efficiency: N	Kg paddy rice/kg elemental N
7. Nutrient use efficiency: P	Kg paddy rice/kg elemental P
8. Pesticide use efficiency	Balanced scorecard
9. Greenhouse gas emissions	Mg/CO2/ha
10. Health & safety	Balanced scorecard
11. Child labor	Balanced scorecard
12. Women's empowerment	Balanced scorecard

Steps taken

1. Comprehensive review and revision of the Performance Indicators started in August 2017
2. Completed in January 2019 (final editing stage)
3. Revised in accordance with SRP Terms of References that were developed in compliance with ISEAL Code of Good Practice for Setting Social and Environmental Standards (P005, Version 5.01, June 2010)

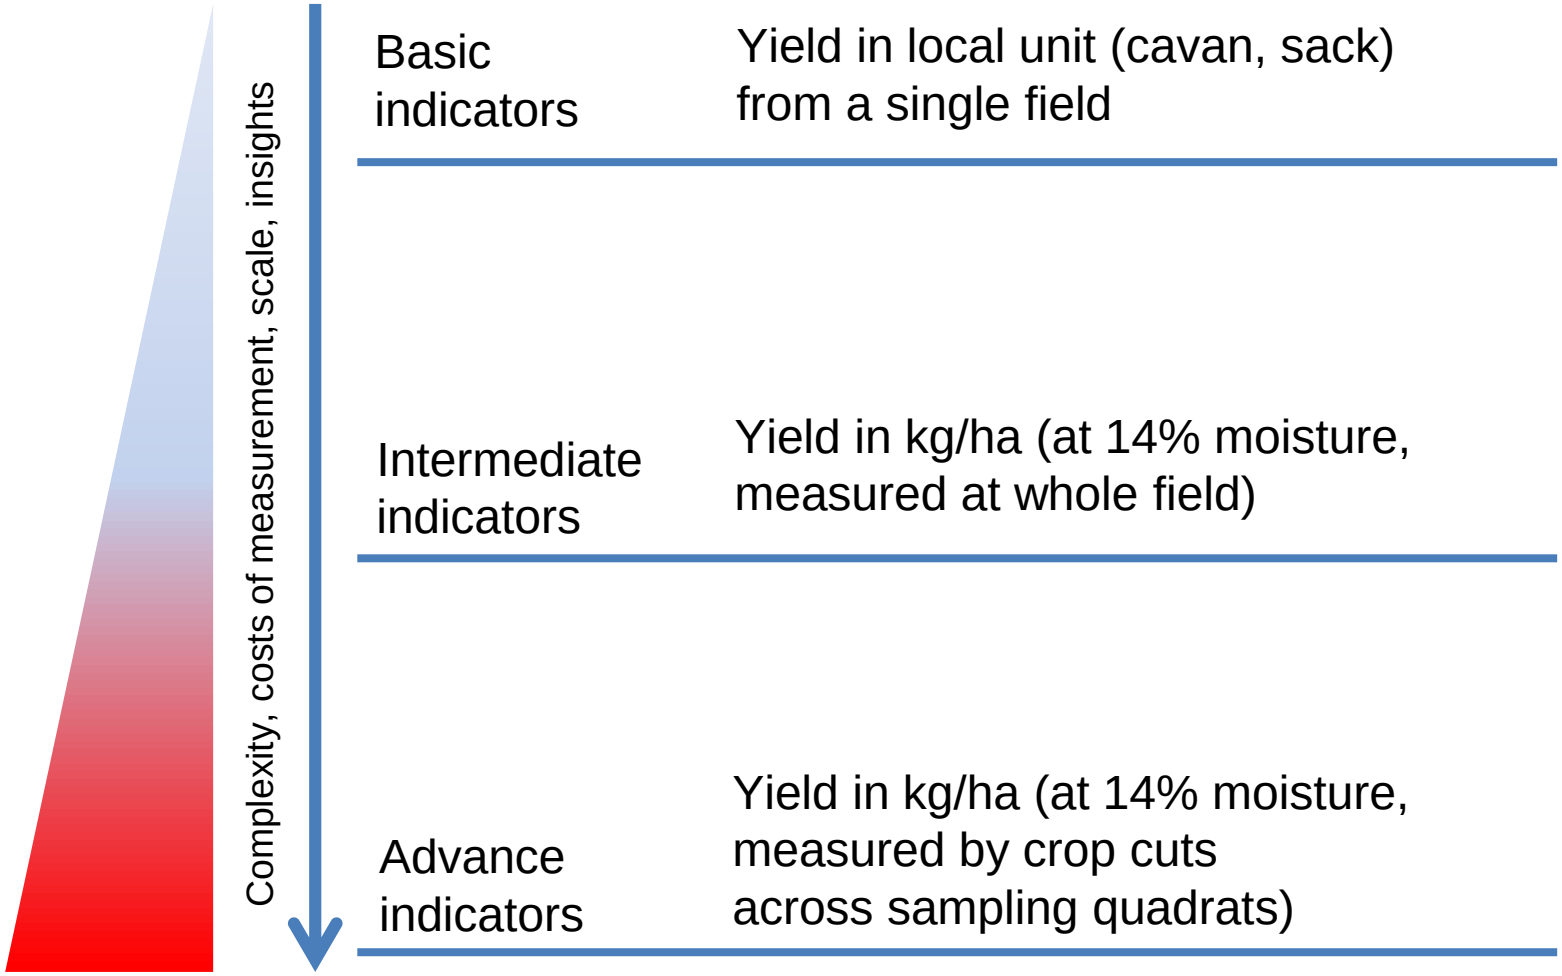
Indicator 3: Grain Yield



Indicator 7: Biodiversity

Basic indicators

Pest and beneficial sightings
Pesticide use (spray/season)

Intermediate indicators

Pest damage ratings
Pesticide use
(# of individual product applications/season)

Advance indicators

Area of land converted to agriculture
Enhancement of edge habitat
Abundance of conservation target species
Abundance of biodiversity indicator species

Complexity, costs of measurement, scale, insights

From here to there

- Data collection tools – interoperability, centralized database?
- Resourcing data collection – how should the collection of intermediate and advance data be funded?
- New indicators – nutrition and financing?
